SKILLS & TECHNOLOGIES

- **Programming Languages / Web Technologies:** JavaScript, Typescript, HTML, CSS, SASS/SCSS, Tailwind, Material UI, React, Angular, NextJs, Node.js, Express.js, Python, React Testing Library, Jest, GraphQL, REST APIs, Redux, Three.js, Gsap

- **Databases:** PostgreSQL, MongoDB, Supabase, Firebase, Prisma

- **OS/Tools:** Linux, Windows, Git, GitHub, Bitbucket, Figma, Webpack, Parcel, Docker, AWS, Vercel, Jenkins, Octopus

- **Others:** Web Development, User Interface Design, UI Architecture

- **Soft Skills:** Leadership, Detail-Oriented, Organization, Time Management, Teamwork, Problem Solving, Excellent Communication, Growth Mindset, Critical Thinking

- **Languages:** English (native)

EXPERIENCE

Bellhop Inc. (Contract)   May 2022 – October 2022
Software Engineer   Remote, Chattanooga, USA

- Spearheaded A/B testing on the marketing site employing Next.js middleware, Growthbook, and Mixpanel, achieving a 10% uplift in lead generation through data-driven optimizations.

- Led frontend development efforts for an online booking system overhaul with React and Material UI, reducing bounce rate by 15% and enhancing the user journey from service selection to payment.

- Implemented a Node.js real-time tracking system to accurately track and verify movers' activities, reducing customer support queries by 36% and boosting customer satisfaction significantly.

- Directed a website redesign to optimize architecture and speed, employing SEO and WCAG standards resulting in a 45% increase in search engine rankings and amplified web traffic.

- Optimized React.js and TypeScript codebases by refactoring critical components, decreasing wait times by 2.3 seconds and improving interaction speed by 800ms for key actions.

Venture Garden Group   May 2018 – May 2022
Frontend Engineer   Lagos, Nigeria

- Redesigned a B2B cross-border payment platform's admin interface using Angular Material UI, increasing transaction processing efficiency by 25%.

- Developed and deployed four key React components (a tooltip, a dynamic form builder, an interactive data table, and a modular notification system), standardizing UI elements across business units, reducing development time, and accelerating product iterations.

- Led the migration of legacy code to a responsive Angular.js application, enhancing client engagement with a 31% increase in total active time.

- Collaborated across product, design, and backend teams in agile sessions to refine and prioritize features, accelerating project timelines and productivity.

- Facilitated knowledge sharing sessions, enhancing junior frontend engineers' capabilities and improving team development skills.

Starlabel   **August 2016 – December 2017**
Web Developer   Accra, Ghana

- Played a pivotal role in a client-focused team, delivering bespoke websites tailored to diverse business needs.
- Enhanced team efficiency and code quality by adoption of structured workflows to streamline team collaboration and maintain high quality codebases.
- Expanded expertise in HTML, CSS, JavaScript, and PHP through the creation of custom landing pages tailored to client specifications.
- Identified and resolved performance issues proactively, integrating latest web technologies to keep digital offerings at industry forefront.

EDUCATION

Staffordshire University   **September 2023**
Masters in Computer Science (Business Computing)   Stoke, United Kingdom

CERTIFICATIONS

- **Design Thinking**: Developed a solid understanding of fundamental phases and methods in design thinking. *Verifiable link*
- **AWS Cloud Technical Essentials**: Gained knowledge about AWS products, services, and solutions to make informed decisions on AWS technologies to use based on business requirements. *Verifiable link*
- **Machine Learning Specialization :** Acquired a comprehensive overview of contemporary machine learning, covering supervised and unsupervised learning and key practices for AI and ML innovation. *Verifiable link*
